

# NUTS NOTES

Vol.19 No.4

November 1981

## U.K. INTERNATIONAL ATHLETES 1896-1981

One of the projects that we would most like to pursue is the collation of a dossier of U.K. International athletes.

No lists of international athletes or full results of international fixtures have been published since 'The Encyclopedia of British Athletics' by Ian Buchanan (1961) and 'British Women's Athletics (Part 2: International 1921-64)' by Peter Pozzoli (1965).

Exactly what we will be able to publish will depend on the economics. While we may at some stage be able to publish summarised results of all events at international matches, the main part will consist of an alphabetical index of UK international athletes with, space permitting, chronological listings of performances in matches and championships. We need to ascertain full Christian names and dates of birth (or death), many previously unpublished. We must also draw up a list of what constitutes an international appearance. Basically it is to follow the guidelines laid down in Ian Buchanan's book (though not necessarily Pozzoli's). All full G.B. and N.I. matches and appearances for G.B. and N.I. at Olympic Games, European Championships, European Indoor Championships, Lugano Cup races etc. qualify, but there are some borderline cases, and indeed the problem of some non-match events.

A possible full layout would look as follows:

PETERS, Mary Elizabeth  
Ballymena AC/Spartan LAC/NI

060739-

Total: 36 + 81

1961	v	Hun	SP	(4)	1230
	v	GFR	SP	(4)	1192
	v	Pol	SP	(4)	1164
1962	v	GFR	SP	(3)	14031
	v	Bel v Neth	Pen	(1)	4420
	v	Pol	SP	(4)	1270
		EC	SP	(12)	1315

The total given in line 3 is the number of appearances in full U.K. international teams (outdoor) followed by the number of appearances in full U.K. international teams (indoor). Data would be given in the same form for appearances in 'B' international teams, etc. as a supplement.

It is not proposed to give additional data such as height and weight, but date of death would be given where known.

Appearances for England, Scotland or Wales would not count, as at the Commonwealth Games, for instance, but it would be a useful follow-up to separately compile international appearances for each constituent part of the U.K.

If you would like to help with this project, and we need volunteers, please contact Andrew Huxtable, 78 Toynbee Road, London SW20 8SR.

Peter Matthews - Andrew Huxtable

AUTOMATIC TIMINGS AT A.A.A. CHAMPIONSHIPS

I was disappointed that the Championship Results summary in the A.A.A. Centenary History did not incorporate photo-finish times prior to 1975 (and curious that, as "A.A.A. Honorary Statistician", nobody consulted me!)

Photo-finish equipment was first installed at White City in 1958 and operated by the Race-Finish Recording Co. (later Racecourse Technical Services) until the move to Crystal Palace. R.T.S. in fact continued at C.P. until the AAA/BAAB took over operations in 1974.

All A.A.A. Senior Championships from 1960 onwards were covered by photo-finish (I have as yet no details of 1958 & 1959), and most results from the early days are listed on the following sheets, together with actual times at 800m upwards from 1975. There are still some gaps in my records for the early 1960's, which I hope someday will be completed. Note that at White City, the 100m, 120y/100m Hurdles and Steeplechase finish were on the back-straight, so no films of these events existed. The 1968 5000m and 1971 10000m were held at Wolverhampton and Portsmouth respectively.

Some other comments:-

Figuerola's winning 100y time in 1964 was officially adjusted to 9.5 (compare other adjustments from originally announced times, such as Nash 21.1 in 1968, Carter 1:45.2 in 1973, Gamoudi 27:23.8 in 1966, etc.)

Ron Hill was A.A.A. Marathon Champion in 1972; Lutz Philipp was not officially entered and ran as a guest (compare the Decathlon in 1968, won by Bill Toomey with 7985).

John McSorley's 1962 Javelin mark of 260'0 converted to 79.25 under measurement rules of the day.

Bob Sparks

1979	Newton	8:38.21
1980	Richards	8:26.92

(Colin Clarkson 8:34.8 omitted from entry on p.205)

A.A.A. JUNIOR/YOUTH CHAMPIONSHIPS

Photo-finish was first used at the 1974 Championships (Crystal Palace), but unfortunately the electrical connection in the gun (activating the timer) failed at the start of the first event (!) and consequently no auto-times were obtained. Photo-finish was next used at Cwmbran (1978), but at Cleckheaton an Accutrack camera gave only a handful of results. At Birmingham (1980), however, full coverage was again obtained.

JUNIORS

800 metres

1978	Spooner	1:50.96

IN BRIEF

My thanks to all those who have contributed to this issue ....

.... Forthcoming issues will include UK All-Time Lists for the Jumps and Throws. As the standard is generally lower on the field than on the track, the depth for performances and performers will not be so great ... anybody wishing to help the team of Peter Matthews, Ian Hodge, Tim Lynch-Staunton and Andrew Huxtable with the compilation of any of these lists, especially the Long and Triple Jumps, please contact Tim at his home address.....

.... In Issue No.2 (Vol.19) a considerable amount of news concerning the activities of members was published, and now that "Who's Who" would appear to have come to an end, the editor would again appreciate any news members may care to send.

Tim Lynch-Staunton.

### BOOK REVIEWS

#### NATIONAL ATHLETICS RECORDS FOR ALL COUNTRIES IN THE WORLD

No less than seven ATFS members are listed as authors of this the latest volume of National Athletics Records.

The dedication in producing this work of 144 pages covering all Olympic events for both men and women is evidenced when glancing through the first event. No less than 185 nations are listed for the men's 100 metres ranging from Jim Hines' 9.95 to the 12.46 of Stu Limehouse (Guam).

Apart from ATFS members and athletics fans, this book has particular value when major championships come around, acting as a check on the validity of submitted performances - who can forget the three performers from Sierra Leone in the Moscow 800 - all supposedly 1.47.4 men.

This can therefore be regarded as a definitive work.

Price:- # 8 Europe, # 10 Outside Europe

Available from: Winfried Kramer, Im Fichtenwald 2, D-6680 Neunkirchen-Kohlhof, FRG- West Germany.

#### CARIBBEAN ANNUAL - 1979

Bernard Linley's Caribbean annual gets better each time. This, the fifth in the series contains summaries of major 1979 meetings, a 1979 Yearlist, and 100 deep all-time performer lists, together with 100 deep all-time performances, a welcome addition.

Whilst results of Caribbean athletes in the USA are frequently to be seen, it's not so easy to catch sight of performances in Cuba or Central America - so Linley's book is an important and welcome addition to anyone's athletics library.

Available from: Bernard Linley, Via Cassia 987, 00189-Roma, Italy (# 8)

#### ENCYCLOPEDIA OF ATHLETICS

Mel Watman's latest edition of the encyclopedia has been reviewed in A.W. but should not be ignored by any fan wishing to keep a quick reference guide to hand on UK and World athletics. As one might expect, it's excellently researched and by ignoring A.A.A. winners before the mid-1950s allows a lot of new data to be included. At £8.95 it's pricey, but on balance worth it.

Available from: A.W. Book Dept., 344 High Street, Rochester, Kent.

Scott Davis points out that his address is 4432 Snowbird Circle, Cerritos, CA 90701, and not as shown in the last NUTS NOTES. Additionally he assures us that a minority of copies were poorly printed and that the 1982 Annual will be better yet.

Richard Hymans

#### THE LONG DISTANCE RECORD BOOK Compiled by Andy Milroy.

Road Runners' Club Publication available from Don Bonser, Sales Officer of the RRC, 80 Benhill Wood Road, Sutton, Surrey. £1.50 including postage.

Almost twenty years ago a member of the N.U.T.S., the late Dave Roberts, produced DISTANCE RUNNING RECORDS, a valuable pioneering statistical booklet that in its lists of progressive best performances for distance runs from 10 miles to 24 hours encapsulated the history of the most blistering form of athletics. By 1976 the lists required substantial updating, and the task was undertaken for the Road Runners' Club, the publishers of the original booklet, by Andy Milroy, with DISTANCE RUNNING PROGRESSIVE BESTS, which was notable for the addition of noteworthy professional performances. A second edition was published in 1978.

THE LONG DISTANCE RECORD BOOK is altogether more ambitious in scope. As an introduction Milroy surveys the history of ultra-long distance running in a 6000 word essay which is not only lucid and authoritative, but supported by information based on research into little-known, but important phases of the sport's development. Nowhere have I seen so comprehensive an account of the part played by running messengers and footmen in establishing a tradition of covering great distances. The essay takes a worldwide view, showing, for instance, how the Anglo-American six-day races of the 1880s were supplanted by the marathon craze and the French Belle Epoque in the next two decades, which in turn were overtaken by the South African Comrades' Marathon (1921) and the "Bunion Derbies" across America in the late twenties. Milroy finishes with the great jogging movement that has created an even more astonishing mass preoccupation with distance running than the excitement over Dorando's Marathon in 1908.

The statistics match the introduction in comprehensiveness, at least as far back into history as reliable timing will allow. The progressive best performances for the linear events are traced back to the 1870s for amateurs and 1850s for professionals, with frequent listings of eighteenth century performances on roads and racecourses noted separately for comparison. The events range from 10 miles to the 62 $\frac{3}{4}$  miles achieved in the six-day races of a century ago. Similar lists for women's events show the astonishing improvements made in the last decade at each test from one hour to twenty-four. Incidentally it was interesting to note that the best performance so far achieved in the six-day races staged in America in modern revivals of the nineteenth century "wobbles" is 430 miles, by Park Barner in June 1981, a performance exceeded by a woman walker, Madame Anderson, with 432 miles in 1878. The fun of a book like this is making such comparisons, between amateurs and professionals, runners and walkers, road-runners and track runners, men and women. It is even possible to compare continent with continent in the section on Continental Progressive Bests for the Hour, 20Km and 30Km. Fell-running, Journey Runs from city to city, Trans-Continental Runs, all are documented, and an index of over 400 names (most with birth-dates) provides an easy reference to the 57 pages of text and statistics.

The eight pages of illustrations include two which seem particularly appropriate to the continuity of distance running. The first shows one of the sport's most successful and individual characters, the late Arthur Newton, handing refreshments to a brilliant runner of a later era, Wally Hayward, in 1953. The second is of Edgar Lloyd, 50 miles record-breaker in 1913, urging Alan Phillips to a record at the same distance 53 years later.

Andy Milroy has performed a tremendous service to everyone interested in the progress and development of distance running. I understand that he has applied to join the N.U.T.S. I venture to say that no more persuasive application could be submitted than THE LONG DISTANCE RECORD BOOK.

Peter Lovesey

---

#### SPECIAL OFFER to NUTS Members

THE OFFICIAL CENTENARY HISTORY OF THE AMATEUR ATHLETIC ASSOCIATION by Peter Lovesey.

Any NUTS member who has not bought a copy of this superb 224 page book, published at £7.95, is invited to take advantage of a special offer of copies for £6.00 including postage.

Already incredible value at its published price, this entertaining book, profusely illustrated with colour and black and white pictures, is a must for the library of every athletics enthusiast.

Please send cheques to: Peter Matthews, 6 Broadfields, Goffs Oak, Waltham Cross, Herts EN7 5JU.

WHO'S WHO IN THE NUTS

PART IV

Details are again given in the following order:

Surname, First Name(s), Date and Place of Birth; Occupation; Marital status and children (if any); Height/weight; Education; Interest (other than athletics); Year athletic interest started; greatest performance(s) witnessed; Best marks (if active).

CARSON, Gerard (Gerry) M.; b. 1.1.42 Belfast; Head of Press & Public Relations Eastern Health and Social Services Board, Belfast, and Freelance (NUJ) Sports Journalist; m., 2 s (Michael - 15 and Christopher - 6), 1 d (Suzanne - 13); 1.79/71.8; St. Malachys College and Ulster Polytechnic; Committee member NI Assoc. of Youth Clubs, Writing (!), Squash, Badminton, Jazz, Rock n' Roll, Hospital Radio, Caravaning; 1959; difficult to pick one - possibly Jenkins winning Euro title as teenager; 10.5 (9.6y), 21.6, 48.7, 41.1 (with help!)

MARTIN, David (known in Army circles as "George"); b. 30.6.47 South Shields, Co. Durham; Warrant Officer 2 in Army currently employed at Headquarters Director Royal Artillery Woolwich. Full time job Secretary National Union of Track Statisticians: Part time job: Chief Clerk of the Combat Development and Tactical Doctrine Cell of the Gunners (served 13 years with Commando Forces before joining the staff and also parachute trained); s.; 5'8"/12st. 9lbs (cannot understand metric measurements hence lack of expert knowledge of field events); College of Preceptors/EPC(A) - Army qualification but not sure of its value!! All sports but in particular rugby union, eating and drinking (see weight problem!); 1961; Dave Bedford's 10000m, Brendan Foster's 2m; 440 yds 54.6 (1962), 880 yds 2:09.7 (1962), 1M 4:53.2 (1963), 1500KStC 4:58.0 (1963), ran a sub 5 minute mile at Blackheath in 1980 for £10 (now qualified professionally) bet; Joined the NUTS (first time round) on 13 Jul 64 at the tender age of 17 yrs 13 days - this beats Alan Lindop by 115 days as the youngest member. Also believe I was the youngest organiser of a major sports meeting (South Shields Meetings 1964-66) which attracted some of the best athletes in the country.

MORBEY, Edward Keith; b. 16.12.36 Urmston, Manchester; Insurance systems analyst; m., 2 c.; 1.74; Bournemouth School, JSSL (Crail), qualified Services Translator (Russian), F.C.I.I.; table tennis - played for Hertford Vets 1980/81, member of The Ghost Club (available for talks, tours etc.), cricket statistics - member of the Association of Cricket Statisticians (working on stats of Herts C.C.C.), soccer and tennis results collector, drama - member Hertford Dramatic & Operatic Society and Company of Players (had 6 months in repertory - Bognor Regis pier - Tunbridge Wells, Crewe, Chester, Crawley etc.), languages, chess; 1948; first sub 13 min 3 miles Ron Clarke 1965; 10.4 - 100 yds, 20'6" - long jump.

O'NEILL, Anthony (Tony); b. 29.10.31 Bristol; Architectural newsreel travelling projectionist, 26 years army (Army Physical Training Corps); m. 2 d.; 2.10/90kg; Army First Class; Rugby, sport in general, do it yourself; 1951; SP 21.68 Geoff Capes 18 May 80 Cwmbran (I was on the spike), 3 miles 12 mins 52.6 Ron Clarke WR White City, JT 96.20 Paragi 18 May 80 Cwmbran, Ovett's 1500 at CP 1979; SP 13.29 - 58, DT 46.10 - 57, HT 53.62uo - 68 (no officials - trials), 52.00dh-71, 50.60-66, JT 55.80-58, 440 yds 52.1-58, 5 miles road 25 mins 20 - 59;

TEMPLE, Clifford Geoffrey; b. 29.1.47 Ealing, West London; Journalist; m., 1 s (18 mths); 1.79m (5'10½")/11st 7 lb; Haberdashers' Aske's School, Elstree (1958-64); Comedy, local history; 1960; Ron Clarke's 12:52.4 3M WR AAA Champs, 1965; 10,000m track 32:56.2 (71), 10 miles road 57:26 (68), 20 miles road 2:03:03 (74), Marathon 2:52:27 (78)

THOMAS, Philip Robert; b. 4.7.44 St. Helens Lancs; Lecturer (when employed) & journalist; m., 1 s., 1 d.; 5'11/161 (falling); Robins Lane Secondary School, St. Helens Technical College, the Universities of Lancaster, Liverpool, & Keele, passed O levels by correspondence course, A levels at Tech and now has (for what they're worth) B.A.Hons; B.Phil; M.A. and Ph.D. degrees; Interested in cricket, collecting books, writing (currently writing NCCA history), founded Athletic Review 1977, now editing Running Review; I agree with John Lunn (that's an unusual occurrence) no performance is great but I did enjoy several races at the 1960 Olympics, not least Herb Elliott's 1500 metres win and five years later watched intently as Ron Clarke (without the help of pacemakers) broke the world 3 mile record by running less than 13 minutes for the first time; my happiest moment was when my club, Sutton Harriers, won the Girls cross Country team title in 1979; no longer active owing to arthritis although made a recent debut at racewalking 15 Km (97.02), other marks 100 13.0, 200 26.9, 400 59.8, 800 2.20, 1000 4.55, HJ 1.20, LJ 4.50, TJ 5.45 (Northern League for points!), SP 6.94, DT 19.00, JT 33.84, HT 16.96 - fortunately our club got some real athletes and I don't need to compete now. Very active as Secretary of West Lancs CCA, No.5 District Committee member, club coach, letter writer to AW etc. etc.

THORNE, Christopher Julian Ralph; b. 14.4.35 Slough, Berks; Tutor & Lecturer Cambridge University; m., 1 d (16), 1 s (14); 1.75/66; Leighton Park School, Reading 1947-53, University of Cambridge 1955-61, B.A. 1958, Ph.D. 1961, M.A. 1961; major working interest (research) - enzymes & bioenergetics (biochemistry), leisure activities - bird ringing & ornithology, orienteering, archaeology, golf, sex; earliest interest aroused when the 1948 International Cross Country was held in the grounds of my school. I recall seeing Wooderson running there. Also McDonald Bailey and Wint at the old Palmer Park Stadium in Reading 1948-50. I was moderately able as an athlete at school, but nothing at all special. Chataway v Kuts in October 1954 (seen while on leave from RAF) switched it all permanently on. Best performance witnessed: Ovett's 3:49.6 on 31.8.79; When younger I was a mediocre hurdler: best performance 27.6 220y 1957; currently I am orienteering regularly, and made my marathon debut last Sunday (27.4.80), only to be beaten by Leslie Watson by nearly an hour!

TROWBRIDGE, Barry; b. 7.6.49 London; Mel's'boy'; s. (divorced); 1.72/70; Bec School, Tooting 1960-67, Kingston Polytechnic on day release 1967-70, L.I.M.A.; watching most sports, particularly rugby union and cricket, snooker, ornithology, walking - fells etc., real ale, my dogs - 2 Shetland Sheepdogs - as you can see the last 4 can all be combined, thus I love 'England' - it has so much to offer, especially the Lake District; in bad winter of 62-63 we were forced at school to do cross countries. My best pal and I were about equal at sports except at this - where he was much superior. I stuck at it and eventually captained the school at athletics and cross country for 2 years. Like most people with a passing interest it took a hairy individual wearing a black & white vest to stir the embers at the start of the seventies. I'm glad he did, he started the athletics revival in the UK and it is, in my opinion, his bandwagon that Bren, Pascoe, etc jumped on and made flourish. They are all people I admire greatly. I went to Munich for my honeymoon (!) and was hooked after that. I attended 1972 & 1980 Olympics, 1973 European Cup & 1979 European Cup and although at these meets there were some superb performances, particularly Kozak, nothing sticks in my mind quite like Dave Bedford's world record in 1973. The atmosphere (considering it was a Friday night at CP) was electric, I was proud to be British. Steve Ovett's Golden Mile this year was pretty special - but he's my hero anyway so I'll only be accused of bias, and his 1978 2M Coke win over Rono was unbelievable. (You'd guess right if you thought I was something of a rebel. My sports 'heros' are those who seem to upset authorities - Tommy Docherty, Dennis Law, Geoff Boycott, Mohammed Ali, Bob Hillier, JPR (?) Etc.; 1967 (?) - 100y - 11.0, 220 y - 23.7, mile (!) - I never lost a mile at my own school, but didn't have to break 5 minutes too often to win. I am now 'active' again and thoroughly enjoying my twice-a-week 5's. New York watch out!

TURNBULL, Simon Noel; b. 9.12.61 Whickham; Freelance sports journalist (mainly athletics, football, rugby league, rugby union, basketball & snooker); m. to Lesley, 1 d (Hayley) 6 mths; 1.76/76; Whickham Comprehensive School; Snooker - have played Steve Davis, football - trialist with Middlesbrough F.C., (avid supporter of Sunderland F.C. and Whickham F.C. - F.A. Vase holders); literature, cinema, washing nappies, collaring athletes to interview them when they don't want to be collared or interviewed; 1970 - Commonwealth Games - influenced; Allan Wells' 10.29 breakthrough defeating Sanford, Gilkes & Quarrie at Gateshead Games 1978, Yifter's original shift at 1977 Gateshead Games when he beat Ovett over 5000m (13:20.6 to 13:25.0), Cram's World age-16 best for 1500 - 3:47 (knocking 20 secs off his previous p.b.) - at Gateshead; from 1977 (aged 15): 100m-11.4, 200m-23.3, 400m-53.9, former Durham Schools 100m & 200m champion, but just a keep-fitter now.

WALSH, John; b. 20.4.40, Cardiff; Building Society Assistant Branch Manager; m.; 1.68/70; up to GCE 'O' Level at Grammar School 1951-57; rock'n roll & country music, real ale; 1952/53; Ron Clarke's first sub-13 3 miles at White City, John Walsh's 2:32:24 marathon at Harlow 27.10.73, Serafino Antao training over 150's - perfect motion!; 5km-15:23.4 (14.56 at 3mls), 10km-32:20, 20miles-1:54.39, marathon-2:32.24, others include: 100y-10.9, 220y-24.5, 440y-55.4, 880y-2:01.6, 1 mile 4:29.0, 3000m 8:00.8, 2 mls 9:50.4, 3000mSt 10:20.4, 10 mls (T) 54:38.8, 10 mls road 52.00, 20km(T) 70.19, 30km(T) 1:47.19, HJ 1.27, LJ 5.15, TJ 10.49, SP 6.93, DT 29.95, JT 29.34.

WARBURTON, Malcolm Seaton; b. 27.9.47, Warrington; Systems & Programming Manager; s.; 1.84/75; Boteler G.S. Warrington 1958-66, Merton College, Oxford 1966-69; rugby union, other sports, eating, finance, newspapers/journalism, work, politics; 1956; various.

WILKINS, Alfred Percy; b. 20.9.31 London; Chartered Accountant, B.A.A.B. Senior Coach; 1.73/68-70; Raine's Foundation Grammar School; all sports - especially West Ham United, competition bridge, philately, keeping fit; first raced in 1944, real interest started in 1947; Helsinki (1952) 5000 - best race, all existing Mexico (1968) world records, Viren's 10000 win in Munich (1972) - world record and gold medal after falling.

WILKINSON, David Reid; b. 26.11.50, Chesterfield; Met. Police Civil Staff; s.; 1.87/88.98 (6'1½"/14 st.); Chelmsford Technical High School; Football (Sunderland A.F.C.), history (particularly Napoleonic Wars), music, reading, cinema; 1960 (Rome Olympics on TV); Ron Clarke 12.52.4 1965, Viren's 5/10 double Munich 1972, Akii-Bua 47.82 Munich 1972; competed as schoolboy for Hadleigh Olympiads - no performances I care to admit to!

# WORLD & EUROPEAN MARATHON LISTS FOR 1934 - 1937 compiled by Roger Gynn

The lay-out is as before and abbreviations in the last columns after the date are again as follows:

NC, OG etc as normal; but POL = Polytechnic Harriers' marathon; (NC) = denotes a foreign runner in a NC race; nr = national 'record' set; 1, 2 etc = European ranking on the world list; \* before venue denotes the finish of a point to point course where known.

## Errata/Addenda to 1938/39 lists:

1938: Harold Wood (Gynn); National Champions - BEL - Felix Meskens 2:46:15 (Regli); Gerry Malcolmson 11 (Gynn)

1939: Asoletti 2:35:03.6, Furlan 3, Bulzone 5, Maffei 6, Balbusso 7; Pintore 8 - all Milan, 25 Jun. Performances, add - Roccati 2:37:23 4 Milan 25 Jun (Tummolo)

QUERY: Muinonen (FIN) born 1899 - OG entry forms (Kamper/Regli)  
born 1898 - Finnish all-time list et al

NOTE: Many 1936 OG birthdays wrong - Webster 95, Kyriakidis 10, etc.

1981 WORLD MERIT RANKINGS

The problems inherent in one person preparing a world ranking were brought home by one reader last year who wondered incredulously why Reichenbach had been omitted (he should have been placed 3rd). Hopefully no aberrations have occurred this year.

100m

1. Carl Lewis (USA)
2. Allan Wells (UK)
3. Mel Lattany (USA)
4. James Sanford (USA)
5. Stanley Floyd (USA)
6. Ernest Obeng (GHA)
7. Frank Emmelmann (GDR)
8. Jeff Phillips (USA)
9. Ron Brown (USA)
10. Herman Panzo (FRA)

Carl Lewis bombed out in Rome but his US season was so good that he has to be rated No.1. Wells' wins in the European and World Cups were enough to rate him ahead of Mel Lattany. Lattany won the WUG title, produced 10 sub 10.20 clockings (2 windy) but lost out due to poor runs in the TAC, NCAA and Golden races. Sanford at his best was No.1 but ran indifferently at the TAC and failed to appear in Europe in August. Floyd was overshadowed by his countrymen but performed solidly from May to August. Ernest Obeng was good at the AAA and superb at the World Cup. In perfect conditions he would have run 10.10. Emmelmann showed glimpses of greatness which should come to fruition next year. Big Jeff Phillips beat Carl Lewis in a 10.1 race (the blurred picture showed an estimated 10.28 to 10.32) and ran 10.00w in the NCAA, but was frequently burdened by muscle problems. Ron Brown was one of the best kept secrets of the year but missed 2nd in the TAC by 0.02, while Panzo was inspired in the Golden 100 but otherwise very inconsistent.

200m

1. Mel Lattany (USA)
2. Allan Wells (UK)
3. Frank Emmelmann (GDR)
4. Dwayne Evans (USA)
5. James Sanford (USA)
6. Jeff Phillips (USA)
7. Stanley Floyd (USA)
8. Don Quarrie (JAM)
9. Eric Brown (USA)
10. Terron Wright (USA)

Lattany was clearly 1st. He won the World Cup and had 4 of the top 6 clockings. Wells was 2nd in Rome and Zagreb and had a 2-1 advantage over Lattany. Emmelmann beat Wells in the European Cup but seemed overawed in Rome. The 22 year old veteran Dwayne Evans won the NCAA and had 7 of the top 31 clockings. One race does not a season make but Sanford's one good race was the fastest of the year, while Phillips would have been ranked higher but for his inconsistency. Stanley Floyd showed that he wasn't just a 100 man with a win over Wells and an impressive run in the AAA. Don Quarrie, who is expected to retire from sprinting before 1990, had his first individual run in the World Cup and was consistent in the USA. Eric Brown, like Floyd, moved smoothly into the 200 and had 3 sub-20.40 clockings. 10th was Terron Wright, 2nd in the NCAA, one of half a dozen who could have been accorded that position.

400m

1. Cliff Wiley (USA)
2. Bert Cameron (JAM)
3. Tony Darden (USA)
4. Walter McCoy (USA)
5. Mauro Zuliani (ITA)
6. Hartmut Weber (GFR)
7. Willie Smith (USA)
8. Howard Henley (USA)
9. Bill Green (USA)
10. Harald Schmid (GFR)

Wiley graduated with honours from the sprints winning everything in sight culminating in a splendid win in Rome. Cameron had the fastest time since 1978, and like Wiley gave the impression that 44.0 at sea level was in sight. Darden and McCoy had solid European tournees with the former ahead on the basis of his 2nd at the TAC. Zuliani lost to Weber in Zagreb but was an excellent 2nd in the World Cup. Smith was sporadically brilliant and rates 7th ahead of Henley who cracked 45.0 twice but ran poorly in Europe. Green and Schmid cranked out a couple of fast clockings but spread themselves over other events.

### 800m

1. Seb Coe (UK)
2. James Robinson (USA)
3. Mike Boit (KEN)
4. Olaf Beyer (GDR)
5. Detlef Wagenknecht (GDR)
6. Harald Schmid (GFR)
7. Sam Koskei (KEN)
8. Garry Cook (UK)
9. Willi Wulbeck (GFR)
10. Joaquim Cruz (BRA)

Coe was as dominant as Moses (who'll move into the 800 in 1983) in his event. He can be counted with Harbig, Snell and Juantorena as one of the 'greats'. A long way behind James Robinson takes 2nd ahead of Mike Boit. The American was 2nd in Rome, won his 5th US title and took the ISTAF and Van Damme races. Boit ran sub-1.44.6 twice and now has 22 clockings under 1.45 (the next best - Wolhuter has 11) but concentrated his energies more on the 1500. Beyer edges Wagenknecht on the basis of his GDR championships win. Schmid was almost as good as Robinson until struck down by illness, while Koskei was the dominant runner on the US collegiate scene. Cook overshadowed by Coe scored a resounding win over Boit and Schmid in Budapest, while Wulbeck won his 8th consecutive national title (!) and edged Beyer for 2nd in the European Cup. Cruz set a world junior record and won the CAC title and will be a force in the future.

### 1500m

1. Seb Coe (UK)
2. Steve Ovett (UK)
3. Sydney Maree (USA/RSA)
4. Steve Scott (USA)
5. John Walker (NZ)
6. Mike Boit (KEN)
7. Olaf Beyer (GDR)
8. Steve Cram (UK)
9. Jose-L Gonzalez (SPA)
10. Omer Khalifa (SUD)

An undefeated season and 2 world records gave Coe the edge over Ovett who won everything (except Bislett) up to the World Cup. Maree won the NCAA/TAC double and was superb after the World Cup. Scott became the first American to run a sub 3.50 mile and had a better win-loss record than Walker. The Kiwi was magnificent - his tally of sub-3.42.0m/4.00.0y clockings is now more than 100, while another veteran, Boit, finally showed his abilities over the 1500. Beyer won the European Cup and was just edged for 2nd in the World Cup by Walker. Cram won the AAA, showed maturity beyond his years and cracked 3.50, as did Gonzalez, but the latter tailed off after Lausanne in mid-July. Khalifa usually ran 800s, but produced one excellent race in Budapest. Wessinghage, Coghlan and Harbour all produced good times during the season but were inconsistent.

### 5000m

1. Eamonn Coghlan (IRI)
2. Henry Rono (KEN)
3. Hans-J. Kunze (GDR)
4. David Moorcroft (UK)
5. Valeriy Abramov (SU)
6. Barry Smith (UK)
7. Thomas Wessinghage (GFR)
8. Bill McChesney (USA)
9. Suleiman Nyambui (TAN)
10. Fernando Mamede (POR)

Coghlan won 2 fine races - the AAA and the Weltklasse - and 1 atrocious one - the World Cup - to rate No.1. Rono ran himself into top condition and set a 'paced' WR, finally getting out of his 13.12 rut! Kunze progressed from 3rd in Zagreb, 2nd in Rome through to a European record in the best race of the year. Moorcroft showed Viren-like tactical sense in the European Cup and won an excellent fast race in Lausanne. Abramov, 2nd in Zagreb broke his own SU record and just edges Barry Smith who beat him in Helsinki and won the Golden 5000. Wessinghage beat Rono in Koln and set a national record to rescue a disappointing season. McChesney topped the world list for most of the season and would have ranked higher had he won in Gateshead. Nyambui won the NCAA and ran well, but briefly, in Europe. Mamede had 3 good times but lacked competitive fire.

### 10,000m

1. Werner Schildhauer (GDR)
2. Mohamed Kedir (ETH)
3. Geoff Smith (UK)
4. Fernando Mamede (POR)
5. Henry Rono (KEN)

Schildhauer won the European/World Cup races and duly merits 1st place. Kedir ran 5 sub 28.10 races and beat Yifter's national record in Rome, where he became the 1st Ethiopian not to win the World Cup 10k. Smith wiped out Schildhauer in the UK-GDR match and lost the Golden

10,000m (cont)

6. Martti Vainio (FIN)
7. Alberto Salazar (USA)
8. Venanzio Ortis (ITA)
9. Julian Goater (UK)
10. Mike McLeod (UK)

10K only through inexperience. Mamade achieved the No.2 performance of all-time but faded away after a 27.55.6 behind Kadir in early June. Rono ran just one race but looked set to break his world record by mid-September. Vainio produced 4 races under 28.07 and heads Salazar and Ortis who beat him in Rome. Ortis (with Carlos Lopes) made the most welcome comeback of the season. A p.b. in Brussels nets the consistent Goater 9th place ahead of the winner of the Golden 10,000 Mike McLeod.

3000 SC

1. Boguslaw Maminski (POL)
2. Henry Marsh (USA)
3. Mariano Scartezzini (ITA)
4. Patriz Ilg (GFR)
5. Domingo Ramon (SPA)
6. John Gregorek (USA)
7. Tommy Ekblom (FIN)
8. Ralf Ponitzsch (GDR)
9. Masanari Shintaku (JAP)
10. Amos Korir (KEN)

After the tragedy of Malinowski, it seems fitting that a Pole should be top-ranked here. In truth there was little to choose between the top 3, with Maminski's consistency the telling factor. Marsh's 'refusal' at the Rome water-jump cost him top ranking, while Scartezzini was the best when he was 'on' but had some bad races to offset against his brilliant Zagreb win. Ilg beat Maminski in London and took 3rd in the European Cup to edge Ramon for 4th. John Gregorek beat the Soviets in Leningrad and won the WUG ahead of Ekblom. Ponitzsch was beaten by Shintaku in Rome but had a couple of other good races to support his ranking. Korir, the third fastest of the year, but injured a good deal of the time, rounds out the top 10.

110H

1. Renaldo Nehemiah (USA)
2. Greg Foster (USA)
3. Sam Turner (USA)
4. Alejandro Casanas (CUB)
5. Dedy Cooper (USA)
6. Tonie Campbell (USA)
7. Julius Ivan (CS)
8. Larry Cowling (USA)
9. Javier Moracho (SPA)
10. Mark Holtom (UK)

Foster ran 13.03, won the TAC, the US v SU dual and the World Cup but still doesn't rate 1st place. Nehemiah became the 1st man to break 13 seconds, and then had 3 sub 13.10 clockings in 5 days, With Coe's 800 WR, Nehemiah's 12.93 was the performance of the year. Amongst the mortals Sam Turner pulled an interesting switch by moving from the 400H to the 110H with great success - 3 clockings of 13.43 or better testifying to this. Casanas surprised all watchers with his superb World Cup showing losing out only by 4/100. Tonie Campbell and Dedy Cooper both had good races, but the latter's win-loss record was slightly better. Ivan beat Campbell in Budapest, finished 3rd in the World Cup but was at his best in Czechoslovakia. Cowling won the NCAA and the WUG but was not quite as good as the Americans ranked above him. The last 2 places went to Europeans just ahead of Rod Milburn.

400H

1. Ed Moses (USA)
2. Andre Phillips (USA)
3. Volker Beck (GDR)
4. Harald Schmid (GFR)
5. David Lee (USA)
6. James King (USA)
7. Bart Williams (USA)
8. Dave Patrick (USA)
9. Harry Schulting (HOL)
10. Vasilii Arkhipenko (SU)

They'll have to start handicapping Ed Moses soon. This year he topped his previous record of 4 sub-48 clockings in a season (1979 and 1980) with 6 and remained unbeaten and unthreatened. Phillips showed signs for the future that he might upset the king and moved to 4th all-time with his 48.10. Beck beat an unwell Schmid in Zagreb and finished a distant 2nd to Moses in Rome. Lee ran more than 40 races in 1981 and understandably lost to some lesser lights, but won the WUG. King and Williams traded wins with the former a little more consistent, while Patrick was 4th in the TAC and 3rd in the NCAA (though only 5th in the WUG). Schulting and Arkhipenko rank in the order of their finish at the World Cup.

### High Jump

1. Tyke Peacock (USA)
2. Roland Dalhauser (SWZ)
3. Gerd Nagel (GFR)
4. Valeriy Sereda (SU)
5. Leo Williams (USA)
6. Dietmar Mogenburg (GFR)
7. Aleksey Demyanuk (SU)
8. Dwight Stones (USA)
9. Jeff Woodard (USA)
10. Zhu Jianhua (CHN)

Like the 3000 SC this was disappointing after a good Olympic year. Tyke Peacock was ranked 13th= on the world list but cleared 2.28 by about 5 centimetres to win the World Cup. A week earlier he had won in Brussels with the same height - clearing it in his sweat pants! Dalhauser cleared 2.31 and won the European Indoor title, while Nagel was runner-up in both the European and World Cups. Sereda won the European Cup but folded badly in Rome. Leo Williams, who I predict will be the first American to clear 2.35, won the NCAA indoors and outdoors plus the World Cup and comes next. The next 3 were extremely erratic but had moments of brilliance - Stones particularly notable with his best jumping since 1976. Woodard was strictly an indoor specialist but his 2.33 cannot be ignored. Zhu was injured in Rome but won the Asian Trials with 2.30 and lost the WUG only on a jump-off.

### Pole Vault

1. Konstantin Volkov (SU)
2. Thierry Vigneron (FRA)
3. Jean-Michel Bellot (FRA)
4. Vladimir Polyakov (SU)
5. Philippe Houvion (FRA)
6. Earl Bell (USA)
7. Keith Stock (UK)
8. Aleksandr Krupskiy (SU)
9. Sergey Kulibaba (SU)
10. Viktor Spasov (SU)

Winning the World Cup, WUG, Golden Vault and tying for 1st in the European Cup did no harm to Volkov's reputation and indeed he was an easy first. Vigneron won the European Indoor title, and had 6 leaps of 5.70 or better. As before, his competitive record was patchy and Bellot, who tied with Volkov for the European Cup, was generally a tougher competitor. Polyakov was weak at times but set a WR and cleared 5.70 for 2nd in the WUG. Houvion was consistent over 5.50 but overshadowed by his teammates, while Bell hit his best form for 5 years. Stock beat Volkov in a European Cup semi-final and confirmed his ability with 5.65 at the DN-Gala. Krupskiy and Kulibaba were at their best in the USSR, although the former did garner 2nd place in the European indoor. Spasov edges Olson for 10th on the basis of his clearing a higher height for his national title.

### Long Jump

1. Carl Lewis (USA)
2. Larry Myricks (USA)
3. Rolf Bernhard (SWZ)
4. Laszlo Szalma (HUN)
5. Gary Honey (AUS)
6. Shamil Abbyasov (SU)
7. Uwe Lange (GDR)
8. Liu Yuhuang (CHN)
9. Vladimir Tsepelev (SU)
10. Atanas Chochev (BUL)

Lewis had the top 5 marks of the year and won the NCAA/TAC and World Cup to rank No.1, yet it seems cruel to rate Myricks 2nd. He beat Lewis at the TAC indoors, jumped 8.30 in 10 competitions and had a hairline foul of 8.76 at the TAC. Behind these two the standard fell dramatically. Bernhard and Szalma won the European Indoor and the WUG respectively, while Honey almost upset Lewis in the World Cup. Abbyasov took 3rd in the World Cup and European Indoor and Lange won the GDR title and the European Cup. Liu jumped well at the WUG and was a solid 4th in the World Cup. Tsepelev and Chochev had good moments, but apart from the top 2 this was a weak event in 1981.

### Triple Jump

1. Willie Banks (USA)
2. Joao de Oliveira (BRA)
3. Zou Zhen Xian (CHN)
4. Jaak Uudmae (SU)
5. Gennadiy Valyukevich (SU)
6. Aleksandr Beskrovny (SU)
7. Mike Marlow (USA)
8. Bela Bakosi (HUN)
9. Keith Connor (UK)
10. Shamil Abbyasov (SU)

Not just a superb showman, Willie Banks produced the finest season ever by a triple-jumper, with no less than 10 marks at 17.04 or better and the 2 furthest sea level jumps ever. de Oliveira was unimpressive before the World Cup, but won the finest competition of the 3rd World Cup ahead of China's exciting Zou who achieved an Asian record on his last jump of the competition. Zou had earlier won the WUG and thoroughly deserves 3rd place. Uudmae won the European Cup but never looked as good as in 1980, while Valyukevich took a dubiously judged win over Banks in the USA-SU match. Beskrovny is

### Triple Jump (cont)

ahead of Marlow on the basis of beating him in that same dual meet. Bakosi and Connor's seasons were patchy but the Hungarian was generally more consistent. Abbyasov's short lived indoor WR was enough to land him 10th place ahead of Ken Lorraway, Steve Hanna and Aston Moore all of whom had claims to be in the top 10.

### Shot

1. Udo Beyer (GDR)
2. Brian Oldfield (USA)
3. Mike Carter (USA)
4. Yevgeniy Mironov (SU)
5. Dave Laut (USA)
6. Matthias Schmidt (GDR)
7. Wolfgang Schmidt (GDR)
8. Hans-Jurgen Jacobi (GDR)
9. Mikhail Gusev (SU)
10. Reijo Stahlberg (FIN)

Beyer didn't compete much but with wins at Rome, Zagreb plus the GDR title - all between 21.40 and 21.44, he was again the dominant force. One wonders what he could throw in his second event of his junior days - the hammer. At the age of 36 Brian Oldfield is as good as ever. He had 18 marks of 21.04 or better, but was only 4th in the US v SU dual. Mike Carter began to realise his potential, beat Oldfield at the TAC and won the NCAA, WUG and US v SU. Mironov was second in the European Cup and in Rome, but like 5th placer Laut was notably a long way down on his season's best when it came to major championships. The 2 Schmidts come next. Matthias was very strong in early season and even defeated Beyer, but tailed off later, with Wolfgang beating him in the GDR championships. Jacobi was solid in June, particularly the GDR-SU match, where he edged Gusev. Stahlberg takes 10th place - he was more consistent than Feuerbach, Reichenbach and the rest.

### Discus

1. Armin Lemme (GDR)
2. Wolfgang Schmidt (GDR)
3. John Powell (USA)
4. Luis M. Delis (CUB)
5. Imrich Bugar (CS)
6. Markku Tuokko (FIN)
7. Knut Hjeltnes (NOR)
8. Art Burns (USA)
9. Dmitriy Kovtsun (SU)
10. Alwin Wagner (GFR)

The initial problem was what to do about Plucknett. Clearly he was the best - but he was the one found to have an added ingredient. Accordingly, he has been excluded, which leaves Armin Lemme, winner of the same triple as Beyer, ranked No.1. Schmidt generally beat Lemme but lost the GDR title and the chance to win the major meetings. Powell was clearly the best 'normal' American - but why really did he not appear in Rome. Delis reaffirmed his reputation as a solid thrower with his 2nd place in the TAC and World Cup; at 104kg he is the lightest top thrower around. Bugar was very consistent and could well spring a surprise in Athens next year. Tuokko didn't compete much outside Finland but had a good win over the US-based Hjeltnes in his European Cup-semi. Art Burns was the best of the US army of veterans (a piece of trivia - you have to go down to 16th place on the US list to find a thrower with 2 syllables in his first name - Carlos Scott). Kovtsun was the best of an uninspired bunch of Soviet throwers. Wagner disappointed in Zagreb but had good throws elsewhere.

### Hammer

1. Yuriy Sedykh (SU)
2. Karl-Hans Riehm (GFR)
3. Klaus Ploghaus (GFR)
4. Sergey Litvinov (SU)
5. Igor Nikulin (SU)
6. Juri Tamm (SU)
7. Juha Tiainen (FIN)
8. Roland Steuk (GDR)
9. Giampaolo Urlando (ITA)
10. Aleksandr Kozlov (SU)

1977 was an off post-Olympic year for Sedykh, but 1981 was very different. He dominated Riehm in both the European and World Cups. Ploghaus was the best in the world early season but tailed off after being beaten conclusively by Riehm in the GFR championships. Litvinov, as usual, fluctuated wildly but was marvellous in the SU v UK match. Nikulin had a sprained ankle most of the year, but recovered to win the Soviet title in September. Tamm was runner-up to Ploghaus in the WUG (and had a 78m throw inexplicably ruled a foul in that meet). Tiainen was the best of the Finns and beat Ploghaus in the Coke meeting. Steuk started his season well (producing a 79m throw warming up in the UK match) but tailed off to a disastrous 7th place in Rome. Urlando was solid - with a good 3rd in the World Cup, while Kozlov completes the top 10.

# Javelin

1. Dainis Kula (SU)
2. Detlef Michel (GDR)
3. Pentti Sinersaari (FIN)
4. Klaus Tafelmeier (GFR)
5. Gerald Weiss (GDR)
6. Seppo Hovinen (FIN)
7. Bob Roggy (USA)
8. Ferenc Paragi (HUN)
9. Uwe Hohn (GDR)
10. Miklos Nemeth (HUN)

Kula, who, in the West at least, carries with him the stigma of shady Olympic judging, showed Lusia-like qualities in coming from behind to win the World Cup from Michel. The East German was strictly a 'one throw' a competition man but won well in Zagreb. Sinersaari was disappointing (as usual) in the World Cup but had 4 competitions at 91.34 or better. Tafelmeier has still to provide a 90m throw but was solid throughout the season. Weiss won the GDR title and was second in the WUG. Hovinen and Roggy shone for only a short period in June/July but at a very high level. Paragi was a shadow of his former self but had a few good competitions. Uwe Hohn looks like the (very large) shape of things to come, while Nemeth as usual competed from January to October (not bad for someone who retired last year) with a notable victory against the Finns on his last throw in the dual meet in September.

# Decathlon

1. Rainer Pottel (GDR)
2. Uwe Freimuth (GDR)
3. Jurgen Hingsen (GFR)
4. Yuriy Kutsenko (SU)
5. Tito Steiner (ARG)
6. Siegfried Wentz (GFR)
7. Atanas Andonov (BUL)
8. Aleksandr Nevskiy (SU)
9. Josef Zeilbauer (AUT)
10. Andreas Rizzi (GFR)

The European Cup, GDR v SU and GFR v SU duals were the main reference points for rankings. The GDR champion and European Cup winner duly ranks 1st. Uwe Freimuth lost by 2 points to Hingsen in Birmingham, but was clearly better elsewhere. Kutsenko was injured in the European Cup but won the SU-GDR dual. Steiner, the giant Argentine won his 3rd NCAA title with an excellent score and duly ranks 5th. Wentz, the GFR 'junior' champion, comes next ahead of Bulgaria's much improved Andonov whose 8200+ scores were backed up with a Cup semi-final win. Nevskiy won the SU-US dual. Veteran Zeilbauer won the traditional Gotzis competition. Andreas Rizzi, the GFR champion, ranks 10th just ahead of Kratschmer, Stark and Anderson. Thompson was robbed of a ranking by the horrendous weather in Canada.

Richard Hymans

# 110 Metres Hurdles - average of ten best performances by British Athletes

The first column shows the result of averaging the best ten non-wind assisted marks, and the second shows the inclusion of 'windy' marks. Both hand and automatically timed races are included.

	Name	'legal'	inc. w.a.		Name	'legal'	inc. w.a.
1	Berwyn Price	13.66	13.60 - 1	17	Gus McKenzie	14.43	14.39 - 22
2	David Hemery	13.75	13.70 - 2=	18=	Don Finlay	14.44	14.32 - 15=

14	Peter Hildreth	14.34	14.31 - 14	30=	Tony Hogarth	14.62	14.47 - 27
15	Alan Cronin	14.36	14.32 - 15=	30=	Rupert Legge	14.62	14.56 - 30=
16	Tony James	14.41	14.34 - 17				

I have insufficient data on auto times to compile top ten averages on these only for such athletes as David Hemery or Alan Pascoe, but the top three current athletes are as follows on automatic timing only:

Berwyn Price	13.77	13.74
Mark Holtom	13.84	13.71
Wilbert Greaves	13.91	13.90

Marks as at 25 September 1981.

Peter Matthews
